

One of the benefits of the “PF77” is that it has a folding edge which allows the child to be placed easily on the scale when being weighed in a lying position and also acts as a leg rest when the child is weighed in a seated position.

The reliability, accuracy and simplicity of use of the latest electronic equipment serves patients and care personnel. It only takes three seconds to obtain accurate weighing results, the end of the weighing is signalled by a "beep".

The appliance is equipped with the following standard functions:

- RESET: restarts the system, returning to zero even if a load is present (enables the net weight to be determined)(Tare)
- HOLD: maintains the weight display, during the whole duration of the weighing, from the time that the display is stabilised.
- REFRESH: restarts the weighing (HOT) without having to lift the child from the scales and/or perform a stabilising of the display (anti-trembling).
- MEM: displays the result of a weighing which is stored in the memory.

Lithium batteries power supply is a standard fitting (supplied with the appliance) or as a variation, you can opt for a mains power supply. The low electric consumption of the scale guarantees a long battery life enabling thousands of weighings. Switching off is automatic or manual.

This Infant scale designed by CAE can also be equipped with an electronic height gauge with digital readout. Quick, accurate, simple to use, a multitude of advantages!

Technical Features

Capacity / Accuracy :	25kg / 10g<15kg>20g
Weighing position :	"Lying" - "Assise"
Standard Functions :	RESET (tare), HOLD, REFRESH, MEM Anti-trembling Automatic turn off Save the weighing Reset to zero (automatic)
Electronic indicator :	Integrated in the chassis
Display :	Digital LCD, easily readable
Power supply :	2 Lithium batteries (or means)
Weighing surface :	68,5 cm x 31(41) cm
Total dimensions :	70 cm x 45 cm x 17 cm
Weight :	15 kg
Total dimensions + height gauge :	70 cm x 47 cm x 22 cm
Weight :	16 kg
T° / HR accuracy guarantee: :	from 0°C to +40°C / <85%HR
Sealing :	IP65 (display) / IP42 (whole)
Manufacturers guarantee :	2 years

Options

Capacity / Accuracy :	30kg / 10g<15kg>20g
Height gauge :	Electronic or mecanic (45 à 85 cm)
Height gauge :	Electronic or mecanic (55 - 95 cm)
Confort :	Imitation leather cushions M1 fitted in the pan
Power supply :	Bloc adapter: 100-240Vac / 50-60Hz / 200mA
